-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Request for Continued Examination*

A request for continued examination under 37 CFR 1.114 including the fee set forth in 37 CFR 1.17(e) was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17 (e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on November 18, 2003 has been entered.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 49, 51, 53-57, 59, 60, 62, 64-68, 70, 71, 73, 75-79, and 81 are rejected under 35 U.S.C. 103(a) as being unpatentable over Pope (US 5140796) in view of Porchia et al. (US 5647100).

Pope (col. 1, lines 31-52) teaches that it is conventional to provide interengaging fastening strips wherein one is blue and the other yellow, such that when joined the result is green. This inherently takes place whether viewed along the Z-axis or the Y-axis. The difference is that the strips are not stated as being translucent. However, Porchia et al. (figures 2, 4, 17-21) teaches that it is common to utilize translucent yellow and blue materials in the fastening strips so as to produce green (col. 8, lines 61-67). It would have been obvious to modify the fastening strips taught by Pope to be old and well known wherein blue and yellow

Art Unit: 3677

strips are combined to produce green so that the materials are translucent as taught by Porchia et al. as being well known in the fastener art so as to create green when viewed along the Z-axis as is inherent when the strips are joined. As to the particular configuration of the fastening strips, the use of flanges and closure elements is taught by Porchia et al. (figures 17-21), including the U-shaped channel closure elements.

***Allowable Subject Matter***

Claims 50, 52, 58, 61, 63, 69, 72, 74 and 80 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
